JANE'S TIMELY GARDENING TIPS

Hi there, I'm Jane the gardening person. I've been in the gardening arena for many years, on TV, radio, writing in magazines and taking garden tours. The big thing I love is plants of all shapes and sizes, edibles, indoor, fruiting, ornamentals... they are all so fascinating. They keep me involved, because without them, where would our world be?

Every so often I will give you my impression of some plants that my friend Di has in her catalogue. Enjoy.

- Jane Edmanson

WHAT'S HOT THIS MONTH...

Agastache, Giant Mexican Hyssop:

Whenever I see an Agastache bees are always close by making them such a good plant to grow. They are a perennial plant growing to a metre or less and colours range from pink to crimson and a watermelon colour. Their tubular flowers attract nectar eating birds and bees and flower over summer into autumn prolifically. Their leaves are aromatic and can remind you of aniseed when crushed.

Agastache is hardy in a very sunny well drained spot and don't need a lot of water once they are established. Treat them like a salvia plant and cut them back when they have finished flowering to encourage new spring growth.

They do have a funny botanical name originating in the hot dry areas of USA like Texas, New Mexico as well in Mexico.
