JANE'S TIMELY GARDENING TIPS

Hi there, I'm Jane the gardening person. I've been in the gardening arena for many years, on TV, radio, writing in magazines and taking garden tours. The big thing I love is plants of all shapes and sizes, edibles, indoor, fruiting, ornamentals... they are all so fascinating. They keep me involved, because without them, where would our world be?

Every so often I will give you my impression of some plants that my friend Di has in her catalogue. Enjoy.

WHAT'S HOT THIS MONTH...

Aussie Natives:

I recently visited an urban garden in Melbourne, which fitted the name "habitat garden" perfectly, with every native plant providing shelter and nectar plus attractiveness. The gardener, being very busy, needed only to zip around with the trimmers once a year to keep it neat and lay some mulch down. Natives are a real bird and butterfly magnet. There are loads of Australian plants to choose from, here is just a few:

Callistemons, the bottlebrushes, are one of the hardiest, taking most frosts and poorly drained soils. In full sun, they will flower prolifically and often with several flushes over the year. Callistemon 'Little John' is noted for its compactness, low growth, can be hedged and has dark red flowers. For a taller growing one, as a screen plant, 'Kings Park Special' is a beauty with clusters of red flowers.

The Woolly Grevillea, *Grevillea lanigera* is a low growing spreading plant with soft pink flowers in winter to spring. The Spider-net Grevillea, *Grevillea Edelmanian* 'Red Wings' is also low growing, spilling over steps and garden edges with masses of red flowers.

Aussie plants provide such good colour and are great for bringing visitors into your space.
